

Dear alurex partner,

Due to the very high order volume this year and the sometimes very long delivery times in raw material procurement (especially for aluminum and steel), we ask you to check your demand for alurex-tools for the last quarter of the year in time and plan possible orders early.

Due to the circumstances described above, we currently have delivery times of 4-6 weeks for some alurex products.

At present, we are also making great efforts to keep prices for 2019 largely stable through various internal measures. However, we still have to wait for the next 2-3 months, because prices for steel were very volatile this year and have risen up by about 10% in the last 6 months.

Considering the last 12 months, Steel has increased due to various factors in some cases even a proud 50%. An insane price increase.

For this we will inform you in due time again but separately.

However, we thank you in advance for your understanding.

In addition, we inform you that we have from 17.09.2018 - 28.09.2018 company holidays and we work during this time only with a small emergency crew.

Please also consider this circumstance in case of any orders!

Thank you very much!!

Best Regards

Fabian Ensslin
